IT Helpdesk FAQ

IT Services · Updated 5 January 2026

How do I connect to office Wi-Fi?

Connect to the network **LowkeyCorp** and sign in with your company email and password. Guests use **LowkeyGuest**; the reception desk issues a daily guest code.

How do I reset my password or VPN password?

Open the self-service portal from the company intranet home page, choose "Reset password" and confirm with the code sent to your registered mobile. Your VPN uses the same password, so resetting it once updates both. IT will never ask for your password.

Which VPN client should I use?

Install the company VPN client from the Software Centre on your laptop. Personal devices are not allowed on the VPN.

How do I report a lost laptop?

Raise a Priority 1 ticket in the IT portal immediately. IT will lock and wipe the device remotely.
